Mr. Harold Weisberg
Route 12
Frederick, Maryland 21701

Dear Harold:

In view of your past interest in this particular subject and not knowing whether or not you might have this material, I am taking the liberty of sending you a copy of Spectrographic file.

In addition, before I foul things up again, I wanted to inform you that I am considering writting to the Archives to request that the Spectrographic items be transfered to the Archives. You will note from the enclosed contact prints of the film plates that one of them has already been seriously fractured. From Kelleys letter it would appear that these materials, the plates in particular, are given no special care but apparently relegated to some dusty file cabinet drawer. If you have any objection or opinions, please advise me at your earliest apportunity.

Sincerely,

Emory L Brown, Jr.
